LAND CONFERENCE

REPUBLIC OF NAMIBIA

2<sup>nd</sup> NATIONAL LAND CONFERENCE  
2018  
OF WORKING LAND REFORMS IN NAMIBIA

## Conference Background And Rationale

Upon attaining political independence in 1990, the new Government of the Republic of Namibia, under the leadership of SWAPO Party, found it necessary to prioritize the question of skewed land ownership and historical deprivation of the Namibian people. The government realized that addressing the land question successfully requires to be grounded in the perceptions and aspirations of the Namibians regarding the importance of land.

Based on this understanding and realities, the Namibian Government initiated a broad-based national debate and discourse with the view of crystalizing and articulating the perceptions and aspirations of Namibians on the land issue. The Government of the Republic of Namibia, through the Office of the Prime Minister, hosted the first ever inclusive National Conference on Land Reform and the Land Question on the 25 June - 1 July 1991 in Windhoek.

The general objective of the first conference was to reach a greatest possible consensus on the land question that would provide a solid basis for the formulation of a policy on land reform and programme of action to implement the agreed changes. During the deliberations it became clear that land reform was not just a question of land tenure but as a component of holistic approach emphasizing the role of land and agriculture in national economic, social and political development.

The conclusion of the first National Conference gave birth to general and specific consensus on how to address the three major areas of concern that emerged, namely; correcting the wrongs perpetrated by colonial dispossession, working towards achieving equity, and developing pragmatic policies to increase the efficiency of land use in order to strengthen the contribution of agriculture to the national economy. Inherent in these recommendation was a commitment and desire to correct the historical injustices but not turning the clock back as it was felt that it would be very difficult, if not impossible, to validate and meet the competing claims to ancestral land.

For the past 28 years the Government of the Republic of Namibia, through the Ministry of Land Reform, certain line Ministries and other agencies, have embarked on the programmes and projects to implement the resolutions of the 1991 National Land Conference. Despite remarkable, quantifiable and qualitative results achieved over the past years of implementation, and given its centrality to the struggle for national liberation, the land question in Namibia still remains one of the most burning issues facing the nation. New challenges and contemporary issues have emerged during the implementation of the Land Reform Programme and these require attention. Therefore, in order to find amicable ways and strategies to address emerging challenges and persistent issues pertaining to land, the President of the Republic of Namibia, His Excellency Dr. Hage G. Geingob, directed the Ministry of Land Reform, through the Harambee Prosperity Plan (HPP) to "host the Second National Land Conference with the aim of taking stock of what was achieved since the first land conference and what more could be done to fast-track the implementation of the recommendations of the first land conference".
