

COMPENDIUM
of
AFRICAN HIGHER EDUCATION PROGRAMMES
in
FAMILY & HOME ECONOMICS,
NUTRITION,
FOOD SCIENCE AND TECHNOLOGY
&
HEALTH SCIENCES

prepared by

UNESCO
in cooperation with the
International Union of Nutritional Sciences

Division of Basic Education
UNESCO, Paris
December 1992

ED/92/WS/19

While compiling this compendium, we communicated several times with each institution and we are especially pleased with the cooperative spirit of exchange expressed by those contacted. Although we have gathered more information on some institutions and less on others, for consistency reasons, we have standardised the presentation of information.

The **institution name** appears on the top of each page and at the bottom right side of each page there is an indication of when the data on that institution was last updated. The **fields of study** offered are indicated according to the way that they are designated by the particular institution. Here, we have tried to identify institutions in each country with **fields of study** most closely related to home economics, food and nutrition and health sciences. [In some countries, e.g., Burkina Faso, Gambia, Liberia, Senegal, Somalia, the closest **field of study** identified to these areas is public health.] **Student enrolment applies** to the particular Centre, Faculty or Department as specified in the institution entry at the top of each page.

Information on **student enrolment and school fees** were obtained from the references cited above or the institution itself (in this case, the figures apply to the year in which the information was updated by the institution). Invariably, with each new academic year there will be fluctuations. This information should be regarded as indicative.

A number of African countries, we note, are particularly endowed with training programmes in the areas of concern-Nigeria, Egypt, Kenya, United Republic of Tanzania, Malawi and Zambia-and many of these programmes offer degrees at Masters and Doctorate levels.

We were unable to identify relevant institutions in the following countries-Angola, Cape Verde, Comoros, Djibouti, Equatorial Guinea, Guinea, Guinea-Bissau, Mali, Mozambique, Namibia and Sao Tome and Principe.

This compendium has been a collaborative project with the **International Union of Nutritional Sciences** and UNESCO. Dr. **Rajammal P. Devadas**, Vice Chancellor of the Avinashilingam Institute for Home Science and Higher Education for Women (Deemed University), Coimbatore, India, serves as Chairperson of the **RUNS** Committee associated with this effort. UNESCO as part of its Individual Internship Programme has offered numerous young professionals the opportunity to contribute to this information exchange project.³ Ms. Wendy Heilman started the initial research on the four compendiums. Ms. Vanessa Holtzer and Ms. Ana Michel provided further assistance with the data collection and processing. Ms. Janelle Miller assisted with finalization of all four compendiums.⁴

³The UNESCO Individual Internship Programme has, since its inception, been of mutual benefit to UNESCO and participating interns. The programme offers young professionals the opportunity to work under supervision within the Organisation in areas directly related to education, science, the social and human sciences, culture and communication. Interns volunteer up to three months of their time to the programme in exchange for the experience gained.

⁴Special appreciation is given to Ms. Josephine Chona and Ms. Allison Hannigan for their computer assistance with data entry. Ms. Chona was especially helpful to the interns throughout the preparation process.
